*NEN-EN13501-1 A1*

Class A1 products will not contribute to fire in any stage, including fully developed fire. For this reason, they are assumed to be capable of satisfying all requirements of all lower classes as well.
**Warnings**

**General**
- Do not use any sharp tools to open the packaging.
- We strongly advise against using power tools.
- Tripping hazard, mind your step.
- Do not put out cigarettes on the bench.
- Do not leave children unattended whilst playing on the bench.
- To avoid danger of suffocation, keep plastic bags away from babies and children.
- Colours can differ over years and from batch to batch.

**Product**
- Do not drag the table, but carry it with minimum 2 people.
- Anchoring the product has to be done by qualified people.
- For anchoring: use suitable bolts or screws from a specialized store depending on the material your terrace is made of.
- The packaging material of the legs must stay intact, you need it to attach the legs to the tabletop.

**Maintenance**

Find maintenance instructions at the downloads section of extremis.com for:

**GALVANISED PARTS**
- How to repair a damaged zinc layer

**WOOD**
- Clean regularly with mild detergent.
- Thorough cleaning with Extremis Wood Cleaner.
- Oil the wood with Extremis Wood Protector. We recommend oiling the wood at regular intervals depending from location and general weather conditions.
- In order to smoothen the surface again after a thorough cleaning, lightly sand your wood with 80 grit sanding paper or a sanding pad.

**RECOMMENDED USE**
- For Extremis Wood Protector:
  - 7 to 10 wood care treatments for Hopper Bench 240
  - 5 to 7 wood care treatments for Hopper Bench 300
  - 3 to 5 wood care treatments for Hopper Bench 240
  - 2 to 4 wood care treatments for Hopper Bench 300
  - 100 - 150 ml for one Hopper bench 240
  - 150 - 250 ml for one Hopper bench 300

**Applications**

Use our packaging material for better support to attach the legs to the tabletop.

1. Leave the box on the pallet.
2. Remove the lid of the box.
3. Take the legs out of the box.
4. Put the lid back on the box.
5. Put the tabletop on top of the box.
6. Assemble the Hopper picnic.

**Floor fastening**

Mark the spots on the ground where you want to anchor the table and drill holes.

**Good to know**

- ‘Hopper’ stands for ‘Hop Picker’ because the range is inspired by hop gardens, harvests and beer fests.
- PEFC™ certified wood originates from sustainably managed forests.
- The Hopper legs are cut out of an aluminium or metal sheet nearly without any loss of material.
- Freestanding only possible with stabilizing support or floor fastening!

**F.a.q.**

**Q:** Do you need to oil the wood?
**A:** Just like other types of wood, Iroko will gradually become rougher and start to turn grey as a consequence of exposure to the sun and rain. Small cracks and crevices can also appear as part of this process. We strongly advise everyone to treat the furniture with our Wood Protector. This 100% natural oil controls the moisture level within the wood, which makes the planks stay stable for longer, and the layer of oil also helps to prevent spilled liquids from being absorbed, so that stains tend to stay superficial. It is best to repeat this treatment at regular intervals.

**Q:** Won’t those wide boards curl up after a while?
**A:** Iroko hardwood & Hellwood are very stable types of wood and Class I. Nevertheless, the tabletop is completely supported by a galvanised frame to which each board is attached separately. The wood has no structural function.
