

Ingenua Shade Sails by Umbrosa

Ingenua Shade Sail Requirements and Guidelines for a Successful Installation

For a successful installation of an Ingenua Shade Sail System, it is essential that all instructions are followed precisely.

- This precisely designed product that requires reading, understanding and precisely following instructions.
- A design should be put to paper only after reading all related instructions.
- It is highly recommended that drawings are completed and send to ShadeScapes for review. Please allow 1-2 weeks for approval or feedback to drawings.

The following is the link to the Ingenua Shade Sail design page on our website.

<http://shadescapescamericas.com/products/umbrosa-ingenua/>

- Note on this page we offer the Ingenua Configurator (Metric) at this link to help layout your installation and perfect your objectives for shade and mounting.

On this webpage you will find a section at the bottom of the page called DOWNLOADS - TECHICAL.

The first column to the left in this DOWNLOADS section is SPECIFICATIONS.

- Select the specifications that matches the shape of Shade Sail you will be installing. Follow these instructions precisely.
- If these instructions are not followed, you may improperly install your mounts, resulting in an imperfect Shade Sail installation.
- Without properly mounting and aligning your connection points, it will be difficult to perfectly align and tension your shade sails for optimal appearance and use.

The third column on this page has several PDF's that if downloaded and reviewed, will explain the correct use of each Ingenua component.

- Download and read about every component you will be using in your installation to assure proper mounting, alignment and tensioning of the sails.
- Please note the PDF in this column called the Ingenua Shade Sail Introduction.
 - This is important to read closely as it covers more details about the system that are critical to be aware of when working on the design for your order and installation.

At the bottom of the webpage, there is also a helpful video to be viewed multiple times, in addition to precisely following all installation instructions.

- The Ingenua Shade Sail System is designed as a non-permanent removable shade system.
- The sails are intended to be placed in a horizontal position when winds increase and completely removed in winds approaching 25-30mph, especially if wind gusts are expected to be higher.
- The system is designed so that the sail can be easily de-tensioned and removed or reinstalled and re-tensioned.
- The sails are not intended to be left up in medium or heavy rain and when installed should have a slope to them to shed water in case they do get caught in a rain storm.

ShadeScapes nor Umbrosa take no responsibility for improper mounting, alignment and tensioning of Ingenua Shade Sails resulting from not fully reading, following and abiding by all instructions.
